NETWORK KINGS

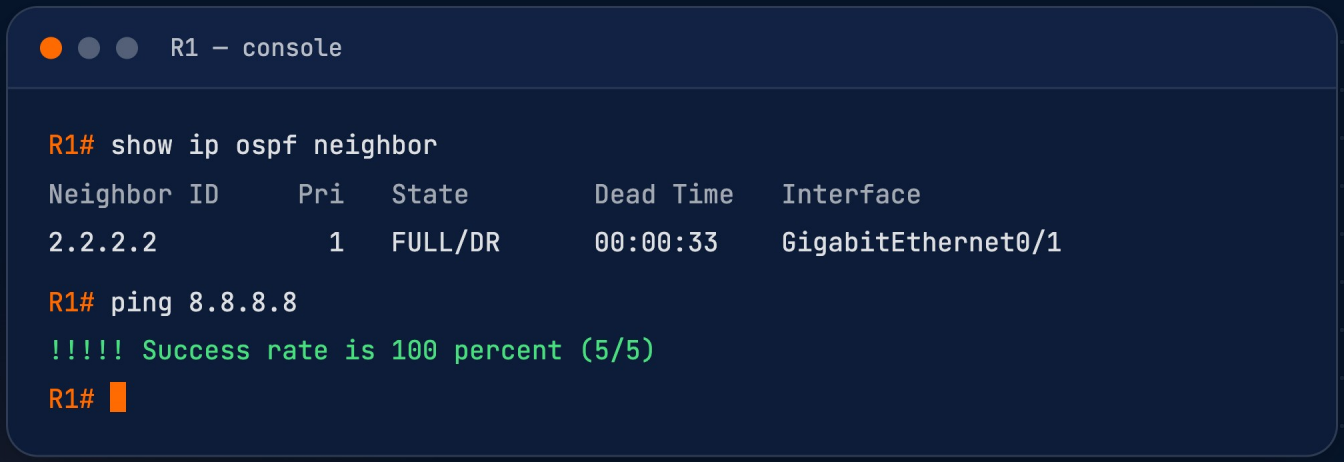

config.nwkings.com

CONFIG BY NETWORK KINGS

Unlimited Labs. 24×7.

Practice CCNA, CCNP, Juniper, firewalls, SD-WAN and automation on real device CLIs — in your browser, at any hour, from any city.

>_ Become a CLI King with Network Kings

VENDORS YOU'LL CONFIGURE

Cisco · Juniper · Palo Alto · Fortinet · Check Point · Arista · Versa · F5 · Aruba

WHY CONFIG

Stop Watching. Start Configuring.

Most learners know the theory and freeze at the command line. Config closes that gap — every topic comes with reading, a lab, scenarios and exam questions, so you finish with commands in your fingers, not just notes in your notebook.

01

Learn

Reading material that starts from the basics, then builds up to design and troubleshooting.

02

Lab

Hands-on CLI labs on routers, switches and firewalls — plus scenarios that mirror real jobs.

03

Prove

Timed exams, a track exam and a free certificate you can share with a verify link.

Labs That Never Close

Open a lab at 2 a.m. or on a Sunday. No lab slots, no waiting for a batch, no installing anything on your laptop.

CLI First, Always

Anyone can click through a GUI. Jobs are won at the command line, so every lab opens in the CLI by default.

Multi-Vendor, One Platform

Cisco, Juniper, Palo Alto, Fortinet and more under one login — and you can build your own topologies with packet capture.

Real-World Practice

Work tickets, run industry projects and step into a server room — practise the way network engineers actually work.

Built by Network Kings

Backed by a community of 320,000+ IT learners.

INSIDE THE LABS

Everything You Need to Practise Like a Pro

Eight things that turn a lab simulator into a place where you actually become job-ready.

Build Your Own Lab

Drop in routers, switches, firewalls and endpoints from different vendors, cable them up and capture packets on any link.

AI Lab Builder

Describe a lab by typing, speaking or uploading a topology picture. Get a working topology, a lab guide and a design check.

Server Room View

Step into a live physical view. Plug and unplug cables, power devices off, mount hardware and swap faulty parts.

Internet and ISP Cloud

A simulated internet with DNS and popular websites, plus multiple ISPs for real multi-homing and firewall URL-blocking labs.

CONFIG PRO

Real Experience Tickets

Work ticket queues in daily shifts — 100 days as a Network Engineer — with XP, badges and an AI coach that never hands you the answer.

Industry Projects

Launch industry network designs as implementation projects — branch offices to data centres — with pre-checks and post-checks.

Exams and Certificates

Timed 20, 50 or 100-question exams, then a track exam. Pass at 80% and earn a free certificate with a public verify link.

Resume and Roadmap

Get an ATS score on your resume, add keywords as you finish topics, and follow a train-style roadmap built around your goals.

TRACKS · FREE AND ESSENTIAL

Start Free. Build a Job-Ready Core.

FREE FOREVER

Starter

Sign up with no login wall on the homepage and try the platform before you pay.

- First module of every learning path
- 3 hands-on labs across all paths
- Practice questions on every topic
- Build Your Own Lab, 3 times a month (up to 4 devices)

CONFIG ESSENTIAL — The core tracks for your first networking job — and your next step up.

Routing and Switching

- CCNA
- CCNP ENCOR
- CCNP ENARSI
- JNCIA (Juniper)

Firewalls

- Palo Alto Networks
- Fortinet FortiGate

Automation

- CCNA Automation (200-901)
- Python for Network Engineers

AI Infrastructure

- NVIDIA NCA-AIIO

EVERY TRACK INCLUDES

Reading material · Hands-on labs · Scenarios · Interview questions · Practice exams · Track exam and certificate · Resume keywords

TRACKS · PRO AND EXPERT

Go Deeper. Go Multi-Vendor.

CONFIG PRO Everything in Essential — plus professional-level tracks.

CISCO

- CCNP Security
- CCNP Data Center
- CCNP SPCOR
- CCNP Automation
- CCNP Wireless

JUNIPER

- JNCIS
- JNCIS-SP
- JNCIP

SD-WAN

- Cisco Catalyst SD-WAN
- Versa SD-WAN
- Fortinet Secure SD-WAN
- Palo Alto SD-WAN

FIREWALLS

- Fortinet NSE 7
- Palo Alto Panorama

WIRELESS AND ACCESS

- Aruba ClearPass

AUTOMATION

- Advanced Python for Network Engineers

CONFIG EXPERT Everything in Pro — plus the expert-level tracks.

- CCIE Security
- CCIE Enterprise Infrastructure
- Segment Routing and EVPN
- Prisma Access (SASE)
- NVIDIA NCP-AIN
- CCDE

✓ CCIE tracks use 8-hour mock lab tests with multiple variations, so you rehearse the real exam day.

ROLLING OUT NEXT

- Arista
- F5 BIG-IP LTM
- Check Point
- Juniper SRX
- Sophos Firewall
- Forcepoint NGFW
- Barracuda CloudGen
- VMware vDefend
- Zscaler
- Meraki
- Multicast and QoS
- Network Observability
- Cisco Design (ENSLD, DCID, ENWLSD)

PLANS AND GETTING STARTED

Pick a Plan. Open Your First Lab Today.

Starter FREE	Try the platform first: the opening module of every path, 3 hands-on labs and practice questions.
Config Essential CORE TRACKS	CCNA to automation, with Build Your Own Lab on Cisco, Juniper, Palo Alto and Fortinet devices.
Config Pro MOST COMPLETE	Everything in Essential, plus professional tracks, Real Experience tickets and the full multi-vendor device library.
Config Expert EVERYTHING	Everything in Pro, plus 8-hour CCIE mock labs, CCDE and the most advanced tracks.

Flexible terms from monthly to long-term. See today's pricing at config.nwkings.com.

1. Open config.nwkings.com
2. Sign up on the free Starter plan
3. Pick a track and open your first lab
